Lasernet FO Connector 6.17.1 Released!

2022-05-06 - Harley Britcher - Comments (0) - Lasernet FO Connector News

Lasernet FO Connector 6.17.1 is now available for download on our Knowledgebase.

Please remember to read through the release notes, as they contain examples of how new features may be applied.

Please see our release notes for more information.

Click to view the bug fixes and enhancements in more detail.

This package includes:

- Lasernet default setup with 12 predefined replacement reports
- AX default setup with 12 predefined replacement reports

The Package for Lasernet Connector exists for Dynamics 365 for Finance & Operations **PU49**, **PU50** and **PU51.** It is not required to install a new package when upgrading Dynamics 365 for Finance & Operations - Similarly to when the Lasernet FO Connector package for **PU49** was installed and **upgrading Dynamics 365 for Finance & Operations** to either **PU50** or **PU51** - The original installed package for **PU49** would work after the upgrade.

The recommendation from Microsoft is to use a lsv/LAC-package matching the same build or PU as this could lower the memory usage. However, all three Lasernet FO Connector packages contain the same code and will work across versions.

Deployments or Installations of Lasernet FO Connector packages are forward compatible and therefore it is not possible to deploy or install a **Lasernet FO Connector package for PU51** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
