Document Layout Issue in Lasernet BC Connector 4.3.1.0 and 4.3.1.1

2024-06-03 - Alice Petruzzella - [Comments \(0\)](#) - [Lasernet BC Connector News](#)

Lasernet for Dynamics 365

Due to an issue with **Document Layout** in Lasernet BC Connector 4.3.1.0 and 4.3.1.1, XML versions of reports may contain excessive data.

The **Deactivated** checkbox on each **Filter** line of the **Document Layout** will automatically be selected when a new table is added, a new **Document Layout** is created, or a change is made to an existing **Document Layout Filter**. This can lead to excessive data in XMLs, which may become too large to process.

The issue does not occur if no changes are made to a **Document Layout**.

The screenshot displays the 'SALES INVOICE' document layout configuration in the Lasernet BC Connector. The interface includes a top navigation bar with a back arrow, the title '...t Document Layout | Work Date: 1/23/2025', and icons for edit, share, add, and delete. A 'Saved' status is also visible. Below the title, there are options to 'Suggest', 'Export', 'Import', and 'Copy to other Company'. The main configuration area is divided into sections: 'General', 'Sections', 'Filters', and 'Fields'. The 'Filters' section is currently active, showing a table with columns: 'Deactivated', 'Field No.', 'Field Name', 'Filter Type', 'Field No./Filter Value', and 'Filter Fi'. A red box highlights the 'Deactivated' checkbox, which is checked for the first filter line. The table data is as follows:

Deactivated	Field No.	Field Name	Filter Type	Field No./Filter Value	Filter Fi
<input checked="" type="checkbox"/>	1	No.	Field Value	6	No.

Below the 'Filters' section, the 'Fields' section is visible, showing a table with columns: 'Dea...', 'Type', 'Description', 'Field No.', 'Field Name', 'Table Field Type', and 'Syster Value'. The first field line is:

Dea...	Type	Description	Field No.	Field Name	Table Field Type	Syster Value
<input type="checkbox"/>	Field Value	No_	1	No.	Code20	

Solution

To resolve this issue, clear the **Deactivated** checkbox for each line and save your changes to the **Document Layout**.

We are investigating a permanent fix, which will be included in a future release of Lasernet BC Connector.

We will announce release dates in due course.

If you need to raise a Support Ticket, please do so through our [contact form](#) and remember to include:

- Version numbers.
- Log files (covering the time the issue happened).
- Additional information will be provided on our Support Portal as it becomes available.
