# Input management running with ABBYY version 3.0 and 3.5

2021-06-30 - Alex Clemons - Comments (0) - Lasernet News

Customers running on ABBYY version 3.0 and 3.5 should make it a priority to upgrade to the latest version of Input Management. This is because ABBYY version 3.0 and 3.5 are no longer supported.

The ABBYY version 3.0 and 3.5 licenses can no longer be reactivated when moving to another server.
