Lasernet FO Connector 6.19 Postponed

2023-03-15 - Alex Clemons - Comments (0) - Lasernet FO Connector News

Lasernet Connector for Microsoft Dynamics 365 Finance and Operations 6.19 was scheduled for release on March 20th, 2023. It has now been postponed to Q3 2023.

We will spend the next six months building up test cases in order to automate our test process. This is due to the frequent releases of Microsoft versions.

Automating our test process will ensure that the validation of our Lasernet Connector for Finance & Operations versions goes faster.

This will not affect hotfixes which will still be released as appropriate.

From Q3, we will return with new and enhanced features and updated roadmaps.

If you have any questions about the delay, please do not hesitate to contact us at Lasernet Support.
