Lasernet Core 11.0 Released!

2026-03-02 - Sunil Panchal - Comments (0) - Lasernet News

We are happy to announce that we have released Lasernet Core 11.0!

Lasernet Core 11.0 focuses on refining core functionalities, improving performance, and delivering a better user experience. It includes various updates to the job engine, Config Server, Lasernet Developer, Lasernet modules, Lasernet Form Editor, and Lasernet Printer Service. For more information about the new features in this release, see Lasernet Core 11.0 New Features.

Compatibility Warning

The Lasernet Connectors for Microsoft Dynamics 365 are currently not compatible with Lasernet Core 11.0. We are working towards launching these two products together, but until then, current customers and partners with the Dynamics 365 connectors should continue to use Lasernet Core 10.

Note

Lasernet Core 11.0 is a release that delivers significant advancements in several key areas.

Because of the underlying architectural changes in this release, if you are considering upgrading to Lasernet Core 11.0, we recommend that you thoroughly review the release notes and documentation, fully test your configuration, and reach out to your technical team for support.

This note does not apply to the Lasernet Connectors for Microsoft Dynamics 365, which must continue to use Lasernet Core 10.
