Lasernet Version 10.1.2 Released!

2021-11-04 - Alex Clemons - Comments (0) - Lasernet News

We are happy to announce that we have released Lasernet 10.1.2, which includes some hotfixes carried out for maintenance.

In the Outlook Mail output module, we have removed the support for the multi-request Graph API which was introduced in Lasernet 9.13 and Lasernet 10 which supported attachments of up to 150 MB. We have reinstated the single request Graph API, while we continue to work on solving quirks with the multi-request Graph API.This will temporarily remove the non-functional sending of larger attachments, by now supporting up to 4 Mb attachments, as supported by Microsoft in their single request Graph API only.
