Microsoft's TLS protocol in Office 365 causing Mail Output failure

2022-11-28 - Alex Clemons - Comments (0) - Lasernet News

Microsoft has recently made a change to its TLS handling protocol. This has resulted in a connection failure with the Lasernet Mail Output port when using SMTP with Office365.

See the following knowledge base article for a solution to this issue:

TLS protocol in Office 365 causing Mail Output failure
