Uptime Robot - A New Uptime Monitoring Solution by Formpipe

2024-04-30 - Alice Petruzzella - Comments (0) - Formpipe Cloud News

The Lasernet Cloud team is excited to launch a new uptime monitoring solution for our cloud-hosted customers: **Uptime Robot**!

This solution provides a private status page where customers can monitor the uptime and status of our services.

Customers can easily view all their environments and correlate any downtime with issues caused by hardware or software failures. They can also sign up for alerts to be notified immediately of any issues.

The status page serves as a third-party monitoring tool, whereby if Lasernet Group servers are down, customers can be updated on issues and resolutions.

For the moment, **Uptime Robot** is only available to our banking customers.

Follow this link to read how to access and use the status page.
